Akkrediteringsområde:

Certificering af produkters overensstemmelse med specifikationer i produktstandarder eller andre normative dokumenter inden for sand, sten, og grusmaterialer inden for byggevareområdet.

Standarder/normative dokumenter for hvert af de omfattede produkter er specificeret i en oversigt, der fås hos certificeringsorganet.

Certificeringssystem: Certificering og overvågning som specificeret i produktstandarden eller ved inspektion af produktion og vurdering af prøvningsresultater.

Scope of Accreditation:

Certification of conformity with specifications in product standards or other normative documents for sand, stones and gravel within construction products.

Standards/normative documents for the products covered are specified in a list obtainable from the certification body

Certification System: Certification and surveillance as specified in the product standard or by inspection of production and evaluation of test results.

Gyldig til den:

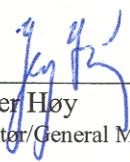

1. juni 2007

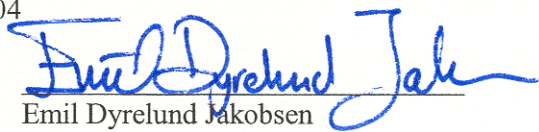

Valid to:

Certificeringsorganet opfylder kriterierne i **DS/EN 45011 - Generelle krav til organer, der udfører produktcertificering** - samt de til enhver tid fastsatte forskrifter angående dets virksomhed som akkrediteret selskab og de for denne akkreditering særligt fastsatte vilkår, som er meddelt selskabet særskilt.

The certification body complies with **DS/EN 45011 - General requirement for bodies operating product certification systems** - together with at any time stipulated regulations concerning its activities as an accredited certification body, and for this accreditation particularly stipulated conditions, as notified separately to the body.
